studies for the first time to readers interested in a Sirah (prophetic life) based universal model for good leadership. Drawing upon scholarly findings from eastern and western sources, and having examined an extensive range of works on Sirah, an original framework of eleven prophetic leadership qualities are presented with an entire chapter devoted to each. Well known and lesser known events from the Sirah are explored and analysed like never before, and viewed with a specialist leadership lens, extracting insights on effective people management, authentic leadership and succeeding against the odds. Each chapter on leadership qualities offers not

only what the quality means and where it can be found in the life of the Prophet, but how one can develop those qualities within themselves as well.

In Islamic Exceptionalism, Brookings Institution scholar and acclaimed author Shadi Hamid offers a novel and provocative argument on how Islam is, in fact, "exceptional" in how it relates to politics, with profound implications for how we understand the future of the Middle East. Divides among citizens aren't just about power but are products of fundamental disagreements over the very nature and purpose of the modern nation state—and the vexing problem of religion's role in public life. Hamid argues for a

new understanding of how Islam and Islamism shape politics by examining different models of reckoning with the problem of religion and state, including the terrifying—and alarmingly successful—example of ISIS. With unprecedented access to Islamist activists and leaders across the region, Hamid offers a panoramic and ambitious interpretation of the region's descent into violence. Islamic Exceptionalism is a vital contribution to our understanding of Islam's past and present, and its outsized role in modern politics. We don't have to like it, but we have to understand it—because Islam, as a religion and as an idea, will continue to be a force that shapes not just the region, but the West as well

The concept of leadership in Islam varies greatly among Muslims. Arguably, the lack of consensus derives from deviations in the interpretation and application of Islamic texts in modern times as well as from pressures exerted by external forces. When the Islamic ethics of disagreement are not observed, the result is the disunion and weakness of the Muslim masses. Tackling this problem requires objective studies and well-prepared consultations. To that end, IGS (Islamic Guidance Society) and ICOJ (Islamic Circle of Japan) intended to make a modest contribution by organizing an international conference on Muslim leadership

and unity in August 2001 in Kobe, Japan. This book contains the research papers, essays, and other works prepared for the conference. Arranged in 5 parts, the 12 chapters of the book combine general and applied works, some focusing on Japan. Rather than opening passionate discussions on the current leadership of the Muslim world, the compilation highlights the prerequisites for successful leadership while investigating the factors affecting Muslim unity. It provides useful information for Muslim scholars as well as leaders at all levels: familial, institutional, national, and international. Cover picture: The Great Faisal Mosque, Conakry, Guinea

At the time of writing, the topic of lead pollution is the subject of an intense and sometimes heated debate. The argument centres upon possible adverse health effects arising from exposure of children to current environmental levels of lead. Such arguments now appear little closer to resolution than they did five years ago, although the development of ever more sophisticated biochemical and epidemiological techniques may eventually provide an answer. Over the past five to ten years, as the general public has become aware of the lead issue, pressure has been put upon governments to limit emissions of lead, and hence limit or reduce the exposure of the population to the

metal. Govern ments and governmental agencies have responded in several ways, varying between those who prefer to take little or no action on the basis that they see no cause for concern, and those who have taken firm action after concluding that the scientific and medical evidence warrants this approach. Any effective control strategy for lead requires knowledge of the sources of environmental exposure and an understanding of the pathways of this metal in the environment. This book aims to provide such information and to explain the methods available for limiting emissions of lead from the most important sources. To put this information in context a chapter

The author of this thought provoking addition to Gower's Transformation and Innovation Series has worked as a management consultant in the Arab Middle East for 25 years. In Islamic Values and Management Practices she acknowledges that businesses and other organizations in the region face urgent concerns in relation to quality and transformation, but argues that these issues might be more appropriately addressed by the application of an Islamic Management Model, rather than the 'Western' one hitherto applied. Over time, a set of management systems based on

Islamic values has been developed by the author. These systems recognise the need to build human organizations, socially and politically as well as commercially, and also the recognition that for Muslims, justice is the ultimate value, bringing balance between the individual's soul and spirit on the one hand, and the organization's soul and spirit on the other. This Islamic management model stresses that effectiveness is an outcome of operating efficiently and at the same time unifying the organization's objectives with those of its employees and wider society, and ensuring that at the strategic level the long view is always maintained. Recounting her own personal and business

journey, Maqbouleh Hammoudeh presents the outcomes of research that has tested the application of the Islamic Management Model and its ability to deliver the desired quality and transformation outcomes in a major civic or profit making organization. At a time when many practitioners and business educators are seeking new management approaches, this revealing case study sheds light on the evolution of a contemporary theory of management for the Muslim World.

interwoven and challenging areas of research and development of future ICT-enabled applications: software, complex systems and intelligent systems. Software intensive systems heavily interact with other systems, sensors, actuators, and devices, as well as other software systems and users. More and more domains involve software intensive systems, e.g. automotive, telecommunication systems, embedded systems in general, industrial automation systems and business applications. Moreover, web services offer a new platform for enabling software intensive systems. Complex systems research focuses on understanding overall systems

rather than their components. Such systems are characterized by the changing environments in which they act, and they evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents features the use of ontologies, and their logical foundations provide a fruitful impulse for both software intensive systems and complex systems. Research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is a vital factor in the future development and innovation of software intensive and complex systems.

The spiritual life in Islam begins with riyadat al-nafs, the inner warfare against the ego. Distracted and polluted by worldliness, the lower self has a tendency to drag the human creature down into arrogance and vice. Only by a powerful effort of will can the sincere worshipper achieve the purity of soul which enables him to attain God's proximity. This translation of two chapters from The Revival of the Religious Sciences (Ihya' 'Ulum al-Din) details the sophisticated spiritual techniques adopted by classical Islam. scriptures and biographies of the saints, Ghazali explains how to acquire good character traits, and goes on to describe how the sickness of the heart may be cured. In the second part, *Breaking the Two Desires*, he focusses on the question of gluttony and sexual desire, concluding, in the words of the Prophet, that 'the best of all matters is the middle way'. The translator has added an introduction and notes which explore Ghazali's ability to make use of Greek as well as Islamic ethics. The work will prove of special interest to those interested in Sufi mysticism, comparative ethics, and the question of sexuality in Islam.

This book examines the concept of leadership from within the Islamic worldview, exploring its meaning and various manifestations through textual evidence from the two primary sources of Islam, The Qur'an and hadith. Using this theoretical framework concurrent with contemporary leadership theory, the authors scrutinise the distinctive leadership dynamics of Islamic organisations within a minority-Muslim context and a focus on Australia. Drawing on empirical data gathered over four years, the nature of leadership and its processes within this unique

context is examined. Leadership in Islam reconciles the problematic processes that exist within Muslim organisational context and offers a set of measures and strategies to improve leadership processes including enacting leadership, enacting following, accommodating complexity, sense making and embracing basics as the core processes. This book will be beneficial for anyone who seeks to understand the meaning of leadership in Islam, the way Islamic organisations operate, and the way forward for improving leadership processes within an Australian/Western context. Now more than ever before, Muslim young men and women

In recent years, the safety management field has placed leadership and commitment at the center of effective workplace health and safety programs. At the same time, personal liability for workplace health and safety has increased, resulting in poor outcomes for individual managers. Discussing the minimum expectations that courts and tribunals have of managers, *Management Obligations for Health and Safety* examines the

relationship between those expectations and effective safety performance. The book looks at safety management from the perspective of management obligations. What expectations are placed on managers at all levels of an organization to ensure that the workplace and systems of work are safe, and how are these expectations considered and analyzed by courts and public inquiries? As importantly, the book explores how management actions in relation to these obligations and expectations influence, positively or negatively, the safety performance of an organization. With examples drawn from legal and quasi-legal processes, one of

the more enlightening and thought-provoking features of this book is the extensive use of cross examination taken from various proceedings. No one person reacts the same to finding him- or herself responsible for managing the aftermath of a death at work, or having to deal with the immediate pressure of being subject to interviews and investigation by safety regulators (much less the drawn-out experience of the legal process), but one of the most constant reactions is "Why didn't anybody tell me about this?" Stressing the importance of safety culture, this book details the true nature of the expectations that are placed on managers by virtue of

On a quiet midsummer day in 1776, weeks after the signing of the Declaration of Independence, thirteen-year-old Jemima Boone and her friends Betsy and Fanny Callaway disappear near the Kentucky settlement of Boonesboro, the echoes of their faraway screams lingering on the air. A Cherokee-Shawnee raiding party has taken the girls as the latest salvo in the blood feud between American Indians and the colonial settlers who have decimated native lands and resources. Hanging Maw, the raiders' leader, recognizes one of the captives as Jemima Boone, daughter of Kentucky's most influential pioneers, and realizes

she could be a valuable pawn in the battle to drive the colonists out of the contested Kentucky territory for good. With Daniel Boone and his posse in pursuit, Hanging Maw devises a plan that could ultimately bring greater peace both to the tribes and the colonists. But after the girls find clever ways to create a trail of clues, the raiding party is ambushed by Boone and the rescuers in a battle with reverberations that nobody could predict. As Matthew Pearl reveals, the exciting story of Jemima Boone's kidnapping vividly illuminates the early days of America's westward expansion, and the violent and tragic clashes

In this enthralling narrative in the tradition of Candice Millard and David Grann, Matthew Pearl unearths a forgotten and dramatic series of events from early in the Revolutionary War that opens a window into America's transition from colony to nation, with the heavy moral costs incurred amid shocking new alliances and betrayals.
